

To All Companies and Individuals Using Diesel Fuels.....August 2007

I operate a 2006 Peterbilt 379 with twin turbos 550-C15 (CAT) Accert Engine with 3.55 gear, 18 speed and 11R 24.5 rubber.

My truck was averaging 5.0 miles per gallon in July 2007. After adding Shellbourne 's Fuel Catalyst, my miles per gallon increased to 5.8. Empty, from Summerstown Ontario, to Cambridge Ontario, my miles per gallon went up to 8.0. Bobtailing the next 900 kms, my miles per gallon, again increased to 9.08.

With this truck and engine set-up, the throttle response has always been poor. For two years I have used different additives, diesel conditioners and boosters to improve M.P.G. and performance.

Nothing worked.....

Shellbourne's Diesel Fuel Catalyst has provided me and many other trucking friends, with the torque and potential horse power, our rigs were manufactured to provide. I recommend the Shellbourne Diesel Catalyst, to anyone.
