---

April 6, 2009

I have been involved with motorcycles since 1974 and have owned and operated a Custom Motorcycle Shop, involved with fabrication, restoration and service of all makes of motorcycles.

I have to say that I was a skeptic when it came to adding fuel additives, but after looking at the product data and speaking with John Shane regarding warranties and manufactures specification I had to give this product a try. I must say that the throttle response that I got was truly amazing, Seat of the pants feeling was there. Shortly after, we at Motorcycle Enhancements, started to promote this product in our shop and at Motorcycle Shows such as the National Motorcycle Show in Toronto & The International Motorcycle Show in Mississauga. Both located in Ontario Canada. Sales of the product have been exceptional since we introduced the Fuel Catalyst.

Shellbourne Fuel's Catalyst has not only maintained it's reputation, but all our repeat clients have been able to use regular grade octane fuels instead of more costly premium fuels, saving them money long term. To date 85% of our sales are repeat clients who will not ride without the Shellbourne line of fuel catalysts.

We continue to work with John Shane of Shellbourne Fuels to introduce other products to compliment our growing list of products that we offer our clients for their motorcycle needs.

In conclusion we have no problems recommending any of the Shellbourne fuel products.
